

CERTIFICATE

WE ARE PROUD TO PRESENT THIS CERTIFICATE TO

Kubra BOZDOGAN

FOR THE SUCCESSFUL COMPLETION OF

ISO/IEC 42001:2023 IT- ARTIFICIAL INTELLIGENCE (AI) MANAGEMENT SYSTEM FOUNDATIONS TRAINING

DURATION: 10 HOURS

COMPETENCIES

Through this foundational course, the participant gained a comprehensive understanding of the international standard ISO/IEC 42001:2023 Information Technology – Artificial Intelligence – Management System, focusing on the core principles and requirements necessary for the responsible, trustworthy, and ethical development, provision, and use of Artificial Intelligence Management Systems. This training equips individuals with the essential knowledge to contribute effectively to the establishment, implementation, maintenance, and continual improvement of an effective AI Management System (AIMS) within any organization.

KEY LEARNING OUTCOMES

- Core ISO/IEC 42001:2023 Principles: Understanding the purpose, scope, and structure of AI Management Systems
- AI Risk and Governance: Identifying AI-specific risks, governance requirements, and integrating AIMS with existing management systems (e.g., ISO 27001, ISO 31000).
- Key AI Terminology: Defining concepts like trustworthiness and AI impact assessment.
- Applying Harmonized Clauses (4-10):
 - Context & Leadership: Understanding organizational context, AIMS scope, leadership, and AI policy.
 - Risk & Objectives: Performing AI risk assessment, setting objectives, and developing treatment plans.
 - Operational Control: Managing documentation, competence, awareness, communication, and operational control of AI lifecycle processes.
 - Evaluation & Improvement: Conducting performance evaluation (audits, reviews) and managing continual improvement and corrective actions.
- Annex A & D Controls:
 - Implementing controls for AI policy alignment (ethics, legal), AI impact assessment, resource documentation, and ensuring transparency, fairness, and security of AI systems.
